# CONCEPT DESIGN

Sustainability is central to our whole design process. It is important to us that we practice what we preach. Our set is built entirely from recycled cardboard board, joined together with paper tape and reusable MAKE-DO screws. Afterwards we donate set pieces to local school and daycares and recycle what we can't keep.

Audiences are wowed by the visual of transforming a space using just cardboard. Often families reach out after the show with pictures of their own cardboard creations inspired by ours. Often there is an expectation that we need to constantly buy stuff to create fun. But cardboard boxes are and can set the imagination free!

We will also offer a complimentary **"CARDBOARD KIDS"** workshop. This is a play space in collaboration with MAKEDO- where people of all ages can come and make their own creations from a selection of cardboard. Some of these will be included in our show.
